### Adobe Illustrator

#### Adobe Illustrator CC (2019) - Part 1 / 395 EUR / Days: 1

This course focuses on Adobe® Illustrator® CC (2019), the component within CC used to create "drawn" graphics, while enabling its users to integrate content from other domains (such as photo-oriented graphics and animation, which belong to Adobe® Photoshop® and other applications). With Illustrator's many easily used tools, you will discover that not only can you unlock the same creative impulses you've always had as you've picked up a pencil to sketch out an idea, but also capture those multiple ideas and "what ifs" during the creative process in ways that you never imagined. And for those of you who are just embarking on building your creative skills, you will be surprised at "how good" your work will appear, even at the outset of your exploration of the world of graphic design.

01/20	·	01/20/22	OLL	10:30 AM - 6:00 PM	HAM

### Adobe Illustrator CC (2019) - Part 2 / 395 EUR / Days: 1

You have created simple artwork by using the basic drawing and painting tools available in Adobe® Illustrator® CC. You now want to use advanced tools, options, and effects to create complex artwork. In addition, you want to ensure that your artwork is ready for commercial printing and also save it for the web. In this course, you will draw complex illustrations and enhance them by using various painting options. You will also use painting tools, manage colors, format type, work with effects, prepare artwork for commercial printing, and prepare graphics for the web.

This course is a great component of your preparation for the Adobe Certified Expert (ACE) Illustrator CC exam and the Adobe Certified Associate (ACA) Graphic Design & Illustration Using Adobe Illustrator exam.

### Adobe InDesign

#### Adobe® InDesign® (2020): Part 1 / 395 EUR / Days: 1

Giving documents a well-designed, professional look will put students a step ahead in the marketplace cluttered with all kinds of communications. Paragraph and character styles that allow students to format pages of text uniformly, layout features that help students to build alternate size configurations of documents, and various panels that enable students to easily customize both text and graphics; Adobe InDesign CC (2019) has all the tools students need to elevate the look of documents and get it out to the people who need to see it, whether it be in print or on the web.

This course is a great component of your preparation for the Adobe Certified Expert (ACE) InDesign CC exam and the Adobe Certified Associate (ACA) Print & Digital Media Publication Using Adobe InDesign exam.

01/13	·	01/13/22	OLL	10:30 AM - 6:00 PM	HAM

## Course Schedule

### Adobe® InDesign® (2020): Part 2 / 395 EUR / Days: 1

In Adobe® InDesign® CC (2019): Part 1 you were introduced to the many features that help you create professional looking documents. Now you need to create much lengthier interactive documents that need to be accessed across a range of devices. In Adobe® InDesign® CC (2019): Part 2, you will learn advanced InDesign techniques to enhance the look and functionality of your documents. Using Adobe InDesign, you can create interactive documents and export them for viewing in a web browser with various features such as buttons, page transitions, movies and audio files, hyperlinks, and animation. You have the ability to assign color profiles and establish print presets. In creating longer documents, you'll be able to include such features as a table of contents, footnotes, cross-references, and an index.

This course is a great component of your preparation for the Adobe Certified Expert (ACE) InDesign CC exam and the Adobe Certified Associate (ACA) Print & Digital Media Publication Using Adobe InDesign exam.

## Course Schedule

### Certified Information Systems Security Professional (CISSP) / 3475 EUR / Days: 5

Welcome to Certified Information Systems Security Professional (CISSP): With your completion of the prerequisites and necessary years of experience, you are firmly grounded in the knowledge requirements of today's security professional. This course will expand upon your knowledge by addressing the essential elements of the eight domains that comprise a Common Body of Knowledge (CBK) for information systems security professionals. The course offers a job-related approach to the security process, while providing a framework to prepare for CISSP certification.

CISSP is the premier certification for today's information systems security professional. It remains the premier certification because the sponsoring organization, the International Information Systems Security Certification Consortium, Inc. (ISC)2, regularly updates the test by using subject matter experts (SMEs) to make sure the material and the questions are relevant in today's security environment. By defining eight security domains that comprise a CBK, industry standards for the information systems security professional have been established. The skills and knowledge you gain in this course will help you master the eight CISSP domains and ensure your credibility and success within the information systems security field.

### CertNexus Certified CyberSec First Responder (CFR) v1.3 / 2975 EUR / Days: 5

This course covers network defense and incident response methods, tactics, and procedures that are in alignment with industry frameworks such as NIST 800-61r2 (Computer Security Incident Handling Guide), US-CERT's National Cyber Incident Response Plan (NCIRP), and Presidential Policy Directive (PPD)-41 on Cyber Incident Coordination. It is ideal for candidates who have been tasked with the responsibility of monitoring and detecting security incidents in information systems and networks, and for executing standardized responses to such incidents. The course introduces tools, tactics, and procedures to manage cybersecurity risks, identify various types of common threats, evaluate the organization's security, collect and analyze cybersecurity intelligence, and remediate and report incidents as they occur. This course provides a comprehensive methodology for individuals responsible for defending the cybersecurity of their organization. This course includes the certification exam voucher.

### CertNexus Certified Internet of Things Security Practitioner (CloTSP) v1.0 / 2855 EUR / Days: 3

This course is designed for practitioners who are seeking to demonstrate a vendor-neutral, cross-industry skill set that will enable them to design, implement, operate, and/or manage a secure IoT ecosystem.

11/01	11/03/21	OLL	2:00 PM - 10:00 PM	HAM
03/09	03/11/22	OLL	3:00 PM - 11:00 PM	HAM

### CertNexus CyberSAFE Extended Edition 2019 (CBS-310) / 195 EUR / Days: 5

Regardless of your computer experience, this class will help you become more aware of technology-related risks and what you can do to protect yourself and your organization from them.

This course will help you to:

- Understand security compliance needs and requirements
- Recognize and avoid phishing and other social engineering
- Recognize and avoid viruses, ransomware, and other malware
- Help ensure data security on computers, mobile devices, networks, the Internet, and in the cloud

In this course, you will use discussions, case studies, and the experiences of your instructor and fellow students to explore the hazards and pitfalls of technology and learn how to use that technology safely and securely.

Course includes access to the CyberSAFE assessment. Upon successful completion of the assessment, learners will receive the CyberSAFE credential and digital badge.

### EC-Council Certified Network Defender (CND) v.2 / 3495 EUR / Days: 5

Certified Network Defender (CND) is a vendor-neutral, hands-on, instructor-led comprehensive network security certification training program. It is a skills-based, lab intensive program based on the security education framework and work role task analysis presented by the National Infocomm Competency Framework (NICF) as well as a job-task analysis and cybersecurity education framework by the National Initiative of Cybersecurity Education (NICE). The course has also been mapped to global job roles and to the Department of Defense (DoD) job roles for system/network administrators.

The program prepares network administrators how to identify what parts of an organization need to be reviewed and tested for security vulnerabilities and how to reduce, prevent, and mitigate risks in the network. CND covers the protect, detect, respond and predict approach to network security.

#### AI-900T00 - Microsoft Azure AI Fundamentals / 590 EUR / Days: 1

This course introduces fundamentals concepts related to artificial intelligence (AI), and the services in Microsoft Azure that can be used to create AI solutions. The course is not designed to teach students to become professional data scientists or software developers, but rather to build awareness of common AI workloads and the ability to identify Azure services to support them. The course is designed as a blended learning experience that combines instructor-led training with online materials on the Microsoft Learn platform (<https://azure.com/learn>). The hands-on exercises in the course are based on Learn modules, and students are encouraged to use the content on Learn as reference materials to reinforce what they learn in the class and to explore topics in more depth.

### AZ-304T00 - Microsoft Azure Architect Design / 1980 EUR / Days: 4

This course teaches Solutions Architects how to translate business requirements into secure, scalable, and reliable solutions. Lessons include design considerations related to logging, cost analysis, authentication and authorization, governance, security, storage, high availability, and migration. This role requires decisions in multiple areas that affect an overall design solution.

### DP-050T00 Migrate SQL workloads to Azure / 1060 EUR / Days: 2

In this course, the students will explore the objectives of data platform modernization and how it is suitable for given business requirements. They will also explore each stage of the data platform modernization process and define what tasks are involved at each stage, such as the assessment and planning phase. Students will also learn the available migration tools and how they are suitable for each stage of the data migration process. The student will learn how to migrate to the three target platforms for SQL based workloads; Azure Virtual Machines, Azure SQL Databases and Azure SQL Database Managed Instances. The student will learn the benefits and limitations of each target platform and how they can be used to fulfil both business and technical requirements for modern SQL workloads. The student will explore the changes that may need to be made to existing SQL based applications, so that they can make best use of modern data platforms in Azure.

### DP-100T01 Designing and Implementing a Data Science Solution on Azure / 1788 EUR / Days: 3

Gain the necessary knowledge about how to use Azure services to develop, train, and deploy, machine learning solutions. The course starts with an overview of Azure services that support data science. From there, it focuses on using Azure's premier data science service, Azure Machine Learning service, to automate the data science pipeline. This course is focused on Azure and does not teach the student how to do data science. It is assumed students already know that.

### DP-200T01 Implementing an Azure Data Solution / 1788 EUR / Days: 3

In this course, students will implement various data platform technologies into solutions that are in line with business and technical requirements including on-premises, cloud, and hybrid data scenarios incorporating both relational and No-SQL data. They will also learn how to process data using a range of technologies and languages for both streaming and batch data.

Students will also explore how to implement data security including authentication, authorization, data policies and standards. They will also define and implement data solution monitoring for both the data storage and data processing activities. Finally, they will manage and troubleshoot Azure data solutions which includes the optimization and disaster recovery of big data, batch processing and streaming data solutions.

### DP-201T01 - Designing an Azure Data Solution / 1060 EUR / Days: 2

In this course, students will design various data platform technologies into solutions that are in line with business and technical requirements. This can include on-premises, cloud, and hybrid data scenarios which incorporate relational, No-SQL or Data Warehouse data. Students will also learn how to design process architectures using a range of technologies for both streaming and batch data.

Students will also explore how to design data security including data access, data policies and standards. They will also design Azure data solutions which includes the optimization, availability and disaster recovery of big data, batch processing and streaming data solutions.

### DP-203T00 Data Engineering on Microsoft Azure / 1980 EUR / Days: 4

In this course, the student will learn about the data engineering patterns and practices as it pertains to working with batch and real-time analytical solutions using Azure data platform technologies. Students will begin by understanding the core compute and storage technologies that are used to build an analytical solution. They will then explore how to design an analytical serving layers and focus on data engineering considerations for working with source files. The students will learn how to interactively explore data stored in files in a data lake. They will learn the various ingestion techniques that can be used to load data using the Apache Spark capability found in Azure Synapse Analytics or Azure Databricks, or how to ingest using Azure Data Factory or Azure Synapse pipelines. The students will also learn the various ways they can transform the data using the same technologies that is used to ingest data. The student will spend time on the course learning how to monitor and analyze the performance of analytical system so that they can optimize the performance of data loads, or queries that are issued against the systems. They will understand the importance of implementing security to ensure that the data is protected at rest or in transit. The student will then show how the data in an analytical system can be used to create dashboards, or build predictive models in Azure Synapse Analytics.

## Course Schedule

### DP-900T00 Microsoft Azure Data Fundamentals / 590 EUR / Days: 1

In this course, students will learn the fundamentals of database concepts in a cloud environment, get basic skilling in cloud data services, and build their foundational knowledge of cloud data services within Microsoft Azure. Students will identify and describe core data concepts such as relational, non-relational, big data, and analytics, and explore how this technology is implemented with Microsoft Azure. They will explore the roles, tasks, and responsibilities in the world of data. The students will explore relational data offerings, provisioning and deploying relational databases, and querying relational data through cloud data solutions with Microsoft Azure. They will explore non-relational data offerings, provisioning and deploying non-relational databases, and non-relational data stores with Microsoft Azure. Students will explore the processing options available for building data analytics solutions in Azure. They will explore Azure Synapse Analytics, Azure Databricks, and Azure HDInsight. Students will learn what Power BI is, including its building blocks and how they work together.

## Course Schedule

### DA-100T00 - Analyzing Data with Microsoft Power BI / 1980 EUR / Days: 4

This course will discuss the various methods and best practices that are in line with business and technical requirements for modeling, visualizing, and analyzing data with Power BI. The course will also show how to access and process data from a range of data sources including both relational and non-relational data. This course will also explore how to implement proper security standards and policies across the Power BI spectrum including datasets and groups. The course will also discuss how to manage and deploy reports and dashboards for sharing and content distribution. Finally, this course will show how to build paginated reports within the Power BI service and publish them to a workspace for inclusion within Power BI.

### Microsoft Teams Courses

#### MS-700T00 Managing Microsoft Teams / 1980 EUR / Days: 4

The Managing Microsoft Teams course is designed for persons who are aspiring to the Microsoft 365 Teams Admin role. Microsoft Teams admins configure, deploy, and manage Office 365 workloads for Microsoft Teams that focus on efficient and effective collaboration and communication in an enterprise environment. This course covers six central elements - Microsoft Teams overview, implementing governance, security and compliance for Microsoft Teams, preparing the environment for a Microsoft Teams deployment, deploying and managing teams, managing collaboration and managing communication in Microsoft Teams. In Microsoft Teams overview, you will get an overview of Microsoft Teams including Teams architecture and related Office 365 workloads. You will be provided an overview of security and compliance in Microsoft Teams and finally get an overview of how to manage Microsoft Teams. In implementing governance, security and compliance for Microsoft Teams, you will plan and configure governance for Office 365 groups including expiration and naming policies. Then you will implement security by configuring conditional access, MFA or Threat Management for Microsoft Teams.

## Course Schedule

### 20744 Securing Windows Server 2016 / 2290 EUR / Days: 5

This course teaches IT professionals how they can enhance the security of the IT infrastructure that they administer. This course begins by emphasizing the importance of assuming that network breaches have occurred already, and then teaches you how to protect administrative credentials and rights to help ensure that administrators can perform only the tasks that they need to, when they need to.

This course explains how you can use auditing and the Advanced Threat Analysis feature in Windows Server 2016 to identify security issues. You will also learn how to mitigate malware threats, secure your virtualization platform, and use deployment options such as Nano server and containers to enhance security. The course also explains how you can help protect access to files by using encryption and dynamic access control, and how you can enhance your network's security.

### Python Programming

#### Introduction to Programming with Python® (v1.0) / 990 EUR / Days: 2

Though Python has been in use for nearly thirty years, it has become one of the most popular languages for software development, particularly within the fields of data science, machine learning, artificial intelligence, and web development—all areas in which Python is widely used. Whether you're relatively new to programming, or have experience in other programming languages, this course will provide you with a comprehensive first exposure to the Python programming language that can provide you with a quick start in Python, or as the foundation for further learning.

You will learn elements of the Python 3 language and development strategies by creating a complete program that performs a wide range of operations on a variety of data types, structures, and objects, implements program logic through conditional statements and loops, structures code for reusability through functions, classes, and modules, reads and writes files, and handles error conditions
